REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)
140-032

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed in patent number 5,696,375, granted December 9, 1997, and for which a reissue patent is sought on the invention entitled MULTIDEFLECTOR

the specification of which

☐ is attached hereto.

☒ was filed on November 2, 1999 as reissue application number 09 / 432,984
and was amended on August 14, 2001
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.

☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.

☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

We believe that we had a right to claim the subject matter presented in claims 23 and following which accompany the reissue specification and which form part of our application for reissue of the above-referenced patent. One of the reasons for partial inoperativeness of the above-referenced patent was the use of the claim term "plates". We believe the use of this term is too restrictive for claim language and will fail to protect the preferred embodiment of the invention which includes bipolar plates wherein each bipolar plate actually consists of a pair of plates separated by an insulator.
